6th June 2018

Yvonne J. Braver, MD FACP

Program Director, Internal Medicine

Dear Dr. Braver,

I hope this letter catches you in good spirits.

I am recent graduate from St. George's University school of medicine. I believe I would be a great fit for your internal medicine program. I have excel in all of my clinical rotations with strong letters of reference to attest to my work ethics and clinical application. I am passionate about medicine, it has been a lifelong dream. I assure you, I have a very punctual and commendable work ethic, I am always looking for opportunity to learn, I take the initiative to teach when given the chance and I thrive well in a team environment. The complexity of residency and the fast moving past requires an individual who works well under pressure and is able to multitask. I am such a person. I have 15 years experience working in healthcare, working with the geriatric population, youth and disable patient population. I simply need a few minutes of your time to discuss with you what I can bring to your team.

Sincerely,

Otis Zeon, MD
